188286	7/1986	EPC
63-260536	4/1990	Japan
0029456	2/1991	Japan

#### **Other Documents:**

Rangan, P. Venkat, "Video conferencing, file storage, and management in multimedia computer systems", Computer Networks and ISDN Systems, March 1993, Vol. 25, No. 8, pp. 901-919 (Article)

Imai, R., et al., "Multimedia Communication Technology", Fujitsu Scientific & Technical Journal, 1992, Vol. 28, No. 2, pp. 172-179 - (Article)

Yager, T., "Better Than Being There", Byte, March 1993, Vol. 18, pp. 129-130, 132-134 - (Article)

Wright, Peter, "Vision by Telephone", Computer Systems, Jan. 1986  
Bramley, (Great Britain) - (Article)

Specifically:

It should be noted, that the reference by Rangan (hereinafter "Rangan"), indicated under category "X," has a publication date of March 1993, which date does not fall more than a year before the filing date (March 12, 1993) of the first parent application (U.S. Serial No. 08/031,235) or the filing date (May 25, 1993) of the present application. Accordingly, it is contended that Rangan (printed publication) does not qualify as prior art under 35 U.S.C. § 102(b). Additionally, the reference by Rangan carries no suggestion of any public use or sale in this country more than one year before either of the above-noted filing dates.

For Rangan to be considered as prior art under 35 U.S.C. § 102(a), the invention as defined by the claims in this application must have been "known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for patent." At the outset, it should be noted that Rangan's system is distinct from the applicant's system. In any event, the inventions described in the parent and present applications were likely conceived by the applicant some reasonable period of time before preparing and filing these applications. Accordingly, even if it is assumed that Rangan's publication date, indicated on the reference as March of 1993,

fell between March 1, 1993, and March 11, 1993, that is before applicant's effective filing date, it is unlikely that any such assumed publication date was "before the invention thereof by the applicant." Additionally, there is no indication in the reference that Rangan's system was in use before applicant's inventions.

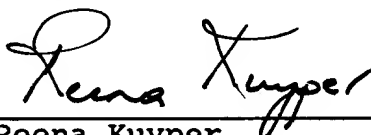

The reference by Yager likewise indicates a publication date of March 18, 1993.

It should also be noted that the claims of the present application are distinct from the claims of the PCT application, with respect to which the search report was prepared.

It is respectfully requested that this Information Disclosure Statement be considered and placed in the file for future access.

Respectfully submitted,

NILSSON, WURST & GREEN
